

**The Society of
Experimental
Test Pilots**

SETP Vision: To be the recognized world leader in promoting safety, communication, and education in the design and flight test of aerospace vehicles and related systems. To maintain a viable professional and prestigious international society for all test pilots and aerospace corporations.

SETP Mission Statement: To broaden professional relationships through the sharing of ideas and experiences which promote and enhance safety, communication, and education. To prevent accidents and loss of life by improving safety, design, and flight test of aerospace vehicles and their related systems. To provide a forum to disseminate information to those in the aerospace industry for the benefit of all aviation users.

Design, Build, & Test an Airplane

Step 1. Design for one of three missions:

Accuracy - **Distance** - **Endurance**

Step 2. Build your airplane:

Step 3. Test your airplane:
